(Registration no:11908441,K19QW)

Synopsis:

School Management Website

School Management System is a complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar.

This school software has a powerful online community to bring parents, teachers and students on a common interactive platform. It is a paperless office automation solution for today's modern schools. The School Management

System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate.

FEATURES:

1) Student Information:

Get easy access to student particulars, their grades, schedules, address, parents info, disciplinary records, extra-curricular activities, and any reports, anytime.

2) Parents Access:

Parents can login and view their children's information by providing the name, Registration no. and Password of the student.

3) Registration:

Manage enquires to school all in one place .

Provides easy mode to register and enroll your child in our school.

4) Email Text and Messaging:

No school today? Have an urgent message to pass? No need to worry, you can text or mail us anytime!

5) Latest news updates:

You can get the latest news about the school, it's activities, achievements of the school, etc..

Software Requirements:

1. Windows 7 or greater version OS
2. Sql
3. Visual Studios or Brackets for text editing.

Advantages:

1) Improve Communication

Teachers, staff, parents, students – all need to communicate. And a more interactive website allows them to do this with greater ease.

2) Save Time and Money

With an interactive site that makes use of a VLE, you can often get things done online much quicker and save money as well.

3) Enhance the Learning Experience

An interactive website can also improve the learning experience. Students can get access to materials that were not available in the class, and they can check notes and resources from anywhere.

Role and Responsibilities of Each Group Member :

- 1) Sai Kiran:** He is responsible for coding of webpage, collecting data, writing synopsis and report of the project.
- 2) Shashwat Tiwari:** He is responsible for collecting data and images related to this project and for report writing of this project.
- 3) Bharthu Sanjay:** He is responsible for collecting online data and images, synopsis writing for this project.
